6/14/76

Dear Harold,

I initially filed these two articles away without making copies for you because I assumed that, since they were datelined Washington, you would get them in the Post. However, several nights ago, Wecht was on a talk show along with Robert Anson and, in the course of the interview, he mentioned these articles. According to Wecht, the 5/30/ article, which was on the front page of our Sunday paper, wasn't carried by the Post or the Times. In case he was right, I dug them out and had copies made.

I called Larry Ford a few days ago to drop some NOT so subtle hints that he should have another show on about the assassination in the very near future. He said that he's been waiting for the release of the Church report on "Oswald's motives" so that he could have someone [redacted] on to give their reactions to it. He definitely intends to ask you and he wanted to know if I knew of any other credible people who would be worth interviewing. I suggested Howard and Sylvia Meagher. I gave him Sylvia's phone number, but I dont have Howard's. If you think Howard would be willing to do the show, I'd appreciate it if you would give me his number.

Remember I told you that the Pitt book [redacted] had shelved your books under "Biography" and that I moved them every time I went in.

Well, whoever kept moving them back must have given up because they're now shelved where I kept moving them to — up front, under political science.

Last week I finally got myself a CB radio for my car. I spent about a week trying to decide what name to pick for my "handle". Since your handle should reflect someone or something you're interested in, I picked "Whitewash". (I hope you don't mind). Now, whenever I'm asked what my handle means, I tell the person it's the name of a series of books that they really should read. Inevitably, we get into a discussion of the assassination. Already, I've had 3 or 4 people express an interest in ordering some books, so I gave them your address. If Betty Ford can campaign over her CB I can plug books over mine!

73's to ya good buddy. (That's best wishes)

Karen
